

Leading valve manufacturer acquired by AR Controls

Highly-engineered premium products at affordable prices

IncoValve and Controls has worked closely with AR Controls to combine the latest design and manufacturing technologies with decades of field experience. This has resulted in premium engineered products that are rugged, affordable, practical, and reliable. AR Controls will use its global leverage to position IncoValve and Controls on an international platform.

INDUSTRIES

Mining, Mineral Processing, Power Generation, Petrochemical, Oil & Gas, Water and Wastewater, Pulp & Paper, Food & Beverage, Sugar, and Ethanol.

BUTTERFLY VALVES

Available in concentric, high-performance, double-offset, and triple-offset severe-service valve designs in various material, trim, and connection configurations from PN10 to PN100.

ACCESSORIES

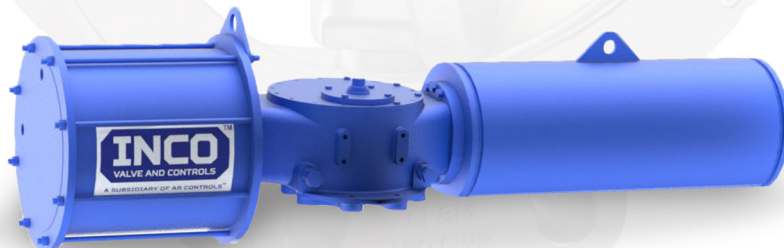

Includes valve lockouts, solenoids, switchboxes, feedback sensors, positioners, and air-filter regulators available to any customer specification.

BALL VALVES

Includes commodity one-, two-, and three-piece flanged and screwed floating ball valves, metal-seated, trunnion-mounted, and severe service ball valves, available in pressure classes up to Class 2500 in various material, trim, and connection configurations.

ACTUATORS

Includes stainless steel and aluminium alloy rack and pinion actuators, high-performance, high-torque output scotch yoke actuators, and stainless steel and standard linear actuators.
